- SQL
- WinForms
- PyQt
- BootStrap
- Git
- MS Office

LANGUAGES

- English: Professional
- Urdu: Native

PROFILE

Computer Science undergraduate at UET Lahore, passionate about software development and coding. Expertise in C++, C#, Python, HTML, CSS, and JavaScript, with hands-on experience in various projects. Eager to leverage my problem-solving skills and technical expertise in the software industry while contributing to innovative projects.

PROJECTS

Video Nexus
HTML, CSS, JS

SOURCE CODE
LIVE PREVIEW

- A web video entertainment platform. It allows users to explore a wide range of video categories, offering a seamless and enjoyable video playback experience.

Escape Plan
C#

SOURCE CODE

- An immersive Windows Form game that highlights advanced Object-Oriented Programming techniques. Player controls a dynamic character navigating the battlefield of tanks and bullets.

Amazon Clone
HTML, CSS

SOURCE CODE
LIVE PREVIEW

- This clone is a replica of the Amazon homepage. This project demonstrates my front-end development skills and core knowledge of css flexbox.

Solitaire
Python, Pygame

SOURCE CODE

- A Klondike-based Solitaire game. It implements different data structures concepts like stack, queue, dictionary, link list and array for efficient gameplay.

Sort & Search
Python, PyQt

SOURCE CODE

- A Python desktop app which scrapes data from Flipkart and allows users to apply 11 different sorting algorithms and perform advanced multi-column searches through a PyQt5-designed UI.
